- DEALERS -Chicago Grain and Provisions, New York Stocks.

BRANCH-10 West Tenth St., Anderson, Ind. Long Distance Telephone, 1375. 11 and 13 WEST PEARL STREET

BUSINESS WELL DISTRIBUTED, WITH INDUSTRIALS LEADING.

Foreigners Issued Selling Orders Through New York Houses-Local Markets Fairly Active.

At New York, yesterday, money on call was easy at 203 per cent.; last loan, 21/2;

closing, 21/2. Prime mercantile paper, 4001/2 per cent. Sterling exchange was steady, with actual business in bankers' bills at \$4.881/2@4.88% for demand and \$4.871/@4.87% for sixty days; posted rates, \$4.88@4.8912 and \$4.90; commercial bills, \$4.86%.

Silver certificates, 68@684c; bar silver, 68c. 'At London bar silver closed at 31%d per

Total sales of stocks were 107,200 shares, including the following: American Tobacco, 8,100; American Sugar, 19,100; Burlington & Quincy, 4.500; Louisville & Nashville, 6,100; Manhattan, 9,500; Reading, 3,400; Rock Island, 3,400; St. Paul, 9,400; Tennessee Coal

and Iron, 7,500. The volume of business in stocks was again on a triffing scale yesterday, but a slight improvement in regard to the distribution of the trading was noted. Commission-house orders were conspicuous by their absence, and the feature of the speculation was a sagging tendency on liquidation by tired for-eign and domestic holders of securities. As a group the industrial shares were outclassed by the railroad list in extent of transactions, although Sugar by far exceeded the total recorded for any other individual stock. There was an element of attempted explanations of the duliness of the market and the few labored movements that were noted. The decline received its houses received liberal selling orders prominent international shares. ouisville & Nashville was exceptionally weak under these offerings, reacting 1% per cent., to 49%. The traders took their cue from the sale and exerted pressure against the list all day, making special efforts against some of the specialties. The gold gements were only about one-half es large as had been expected, amounting to \$1,000,000 on special German account. Houses that had been expected to ship coin were said to have been able to cover their exchange on advantageous terms. An interesting development was a call by the Treasury Department on the depository banks for 50 per cent. of their holdings of government money, to be paid on or before June 1. This will withdraw from the channels of circulation about \$4,500,000, and it is intimated that a further call of a similar mount, cleaning up the account of the banks with the government, may be made on or before June 15. The call did not inuence the speculation, and was not relected in the money market, owing to the plethora of funds at New York both for oreign and domestic account, and the continued large receipts of currency from the interior. The report of the Union Pacific system for March was published, and was considered a rather favorable exhibit. On the other hand, the quarterly statement of Manhattan railway, showing a deficit

after dividend payments, induced a vigorous raid on the stock, which dropped 2% per cent., to 1031/2. Bay State Gas stiffened a fraction on the passage of the Whitney gas in the Massachusetts Legislature, on broke 21/2 per cent. on heavy realizing. Other gas shares were notably weak, par-ticularly Consolidated Gas, which lost 21/2 per cent. Buffalo, Rochester & Pittsburg preferred made a further improvement to 2 on the reported acquisition of valuable soft coal properties. Sugar, Tobacco and Leather preferred were the weakest of the ligh-priced industrials, selling off 1%@1% Tennessee Coal dropped 1% on liquidation, but recovered the fraction. The closing was weak at about the lowest. Bonds were quiet and without notable

luctuations occurred in the less active mortgages. The sales were \$904,000.

Government bonds advanced slightly on

dealings of \$23,000.

NO PROSPECT FOR IMPROVEMENT UNTIL AFTER CROPS ARE ASSURED.

Dun & Co.'s and Bradstreet's Weekly Reviews of Trade Show a General Depression Prevailing.

NEW YORK, May 15 .- R. G. Dun & Co.'s weekly review of trade, which issues tomorrow, will say: It is now the middle of May, too late for business to change materially until the coming crops are assured, and definite shape has been given to the presidential contest by the conventions. Until the future is more clear there is a prudent disinclination to produce much beyond orders, or to order beyond immediate and certain needs. If this waiting spirit prevails two months longer it will crowd into the last half of the year an enormous business if the outlook then is good. For the present there is less business on the whole than a year ago, though more in some branches, and the delay following months of depression is trying to many, and causes numerous failures. An attempt was made to manufacture excitement in cotton out of the government report, but the price closed exactly as it began the week, and the port receipts have been actually larger than last year. All current arguments based on the assumption that the quantity used in manufacture has been or is now at a minimum rate are disproved by the closing of many mills for want of demand and the general effort to reduce wages, which has caused

Wheat is unchanged, in spite of all ru-nors, and the Atlantic exports, flour inluded, which were last year greater than Western receipts for two weeks, 3,059,484 bu. gainst 2,917,305 received, have this year been only half as large, 1,096,414 bu exported, against 4,079,239 Western receipts.

The most fortunate of the chief industries ent is the boot and shoe manufacture. which is not only shipping to customers within 6 per cent. of the largest number of ases ever forwarded in the first half of May, but is getting many new orders, and there are many urgent requests to anticipate orders for June and July delivery, indicating that distribution to consumers has much outrun expectations. The iron and steel inlustry, on the other hand, is pronounced as dull as it ever has been in its whole history at Pittsburg, in part because of doubt about the maintenance of prices recently advanced, and the demand is so small that in spite of such advances prices average 1.2 per cent. lower for the week, Bessemer pig eing no higher than it was three months igo, at \$12.65, while No. 1 anthracite is also ower, \$12.50 at New York. The attempt to hold common bar iron at 1.2c leads many large consumers to prefer steel bars, which sell at 1.7c, and prices of nails are expected to be reduced because of scanty demand. is much promise for future structural work, but orders are deferred, Sales of wool have been a little larger the oast week, 3,543,200 lbs at the three chief narkets, but for two weeks only 6.539,200 lbs.

against over 11,000,000 lbs last year and in 92. The large drives in clothing have cleared out stocks of some ready-made conerns, but check new business, and the general disposition to postpone orders as far Failures for the week have been 224 in the United States, against 211 last year, and thirty-three in Canada, against thirty-seven

Bradstreet's Review. NEW YORK, May 15. - Bradstreet's tomorrow will say: General trade throughout the country remains quiet, wholesale merchants continue conservative and the distribution of general merchandise is almost of a hand-to-mouth character. South and Southwest business remains dull and featureless and unchanged from last week. At paring to start out, but unfavorable features in recent weeks with respect to cotton and Inc., 9.8 | woolen and steel and iron industries show no change. Collections in most directions continue unsatisfactory. Concessions have been made in prices of

wool, and manufacturers of cotton goods complain that prices are below a parity with the cost of raw material. Tobacco is depressed by trade embarrassments, and quotations are weaker, except for Havana. The demand for iron and steel is disappointing, and quotations for Bessemer pig have been Dec. 16.4 | shaded further. Unseasonable weather has had an unfavorable influence on sales of clothing and other staples, while labor dis-Exclusive of New York. 446,156,046 Dec., 3.6 | turbances at some Western cities have checked the demand. The request for lumber is smaller than anticipated, and dry weather in the South has emphasized the duliness of last week. Exports of wheat (flour included as wheat) from both coasts United States this week amount to 1,827,000 bushels, against 1,882,000 busnels last week, 2.397,000 bushels in the corresponding week one year ago, 2,420,000 bushels two years

The recent average weekly commercial death rate is continued, with a total of 265 business failures throughout the United Etates this week, against 267 last week, 210 strong. Grocery, iron and hardware deal-sponding week of 1834 and as compared with ers are getting good prices, but in the run 255 in the like week in May, 1893. SHIPPING DEMAND

CAUSES WHEAT TO DECLINE, JULY FUTURES LOSING ONE CENT.

More Favorable Weather Leads to Weakness in All Grains-Provisions Also Went Off.

CHICAGO. May 15 .- Wheat finally succumbed to-day to the absence of shipping demand. The weakness was further augmented by more favorable crop reports and July wheat finally closed 1c lower than yesterday's final figures. Other markets were also affected, corn closing %c lower, oats 16c lower and provisions 5@15c lower. Wheat was nervous and easily influenced, but price changes were unimportant up to noon, when the market was about where it closed last night. There was absolutely nothing in the trading during the first hour of sufficient importance to have any effect on prices, and what little fluctuation there was was due to the limited amount of buying and selling that transpired. At the opening prices were a trifle firmer, but

there was nothing to influence them and the fluctuations during the first hour amounted to only 1461/sc. Crop damage reports were plenty, but in view of the fact that the country still declines to purchase on the strength of unfavorable crop reports, the trade continued skeptical regarding their reliability. When the New York clearances came in, showing that 185,210 bushels had been exported, the bulls took heart, in view of the fact that this is the largest amount cleared on any one day for some time, and started an advance. Prices rallied %@1/20 from the previous low point, but soon reacted. July opened about 14c lower at 63% 66314c. sold to 63% and back to 634c. During the last hour the crowd awoke to the fact that the crop reports were more favor-able to-day. The Northwestern Miller estimated the European crop at 300,000,000 bu larger than last year. Kansas City reported that country advices indicated a big im-provement in the Southwest, owing to rains and cooler weather. French advices indi-cated that the drought had been broken in that country and the damage in Michigan was reported unimportant. The market broke to 62% for July, closing weak at

that price. Corn was inactive and did little more than follow wheat. Cables came 1/4 lower and receipts were a little heavier, which helped in creating the weak feeling manifested. July opened unchanged at 29%c, touched 30c and closed easy at 29½c.
Only a moderate business was doing in oats. The feeling was easier and prices declined in sympathy with wheat and also influenced by more liberal receipts. July opened unchanged at 19%c, touched 19%c and closed weak at 191/2c.
Provisions opened about steady and prac-

tically unchanged on the better tone of the live stock market, but soon yielded to the influence of their weak surroundings in the grain pit. From steadiness the feeling soon changed to slight depression and later to a greater extremity of heaviness. The closing prices were the lowest of the day. July pork opened at \$7.80, declined to and rested a: \$7.65. July lard lost .05c, and ribs .071/2c. Estimates for Saturday-Wheat, 6 cars; 250 cars; oats, 200 cars; hogs, 15,000

Leading futures ranged as follows: Open- High- Low- Clo Wheat-May ***** ***** Oats-May -May ***** \$7.80 Sept 7.95 7.821/2 Lard-May July Sept 4.85 4.85 4.80 Ribs-May July Sept 4.271/2 4.271/2 4.20 4.20 Cash quotations were as follows:

BROAD RIPPLE VAULT CLEANER POLLUTED THE RIVER.

Board of Works and Board of Health Meet Mr. Davis This Morning and Discuss Water Supply.

An investigation set on foot by the health authorities, following a clew given them by F. A. W. Davis, vice president of the Indianapolis Water Company, has resulted in discovering the cause of the recent pollution of the city water and will shortly result in remedying the trouble. About three weeks ago Mr. Davis wrote to the State Board of Health complaining of the danger of possible pollution from some vaults at Broad Ripple Park and asking that they be abated. He also asked that an investigation be made of the state of affairs in that vicinity. He said in his letter:

"The deep interest of the water company in keeping pollution from the river lies the fact that if a great fire or drought should compel the use of the river water it would be presented in as good condition as possible. This same interest of the water company extends to the keeping clean and free from pollution the region in the neigh-borhood of their supply. From the water company's station, by the meanderings of the river, it is sixteen miles to Broad Ripple and this has much to do with the dilution and oxidation of the washings, and so rendering them harmless.'

Accordingly Dr. Hurty, secretary of the dling, 79-16c; receipts, 55 bales; shipments, 624 bales; stock, 45,375 bales; sales, 590 bales. | State Board, requested Dr. A. L. Wilson to ple, in making a sanitary survey of that region with particular reference to the banks of the river and canal. Thursday night it was reported that unknown vault cleaners had dumped quantities of their refuse at the river's edge between this city and Broad Ripple. They had also dumped a part of the refuse into the stream and washed their tubs in the water. It was plain that the pollution discovered by Dr. Ferguson had the supposed cause of death. been added to the river below Broad Ripple. The health authorities hurried at once to Broad Rippie to get some trace of the perpetrators and finally succeeded in tracing a part of it to W. W. Pettit, a vault cleaner who travels about from town to town in the State pursuing his business. Pettit was considerably frightened and extremely sorry when told of the consequences of his care-less action. He replied that he had no idea that he was violating the law or causing any trouble. He was willing to do anything that he could to repair the injury and came down for a long conference with Dr. Hurty yesterday. The health officers were con-vinced that he had made the blunder through ignorance and did not cause his arrest. He now has all his assistants employed in cleaning up the refuse that was dumped on the banks of the river and is taking it inland, where it will be spread thinly over the ground and disinfected with chloride of lime. He has promised that in the future he will dump no more in the streams of the State, but will follow this plan of spreading the refuse, exposing it to the sun a couple of days and plowing it under the ground. Dr. Hurty has secured a complete list of these peripatetic vault cleaners throughout the State and will take

measures to have them follow the same Dr. Ferguson thinks this discovery has thoroughly vindicated his action in making his report on the condition of the water. In a conversation yesterday he said: think Mr. Davis must now draw in his horns and admit that my evidence as to the pollution of the water is correct and ask for no evidence of others more experienced in this line of work than I. Further than that, it seems to me that Mr. Davis should not have been so positive in denouncing my work in the light of his letter to Dr. Hurty, calling attention to the fact that he under stood vaults were polluting the river. He surely must have known when I made my report that I had found recal bacteria that t was simply a verification of the report he had received from Broad Ripple. It seems to me that his duty to the people would have been to have made a thorough examination of the river when he first heard the report from Broad Ripple, and not wait for it to be discovered by an analysis of the water after an unusual number of cases late developments are conclusive proof that the typhoid in this city has partly been caused by the city water. Our investigation Old bucks, per head 2.00@3.50 at Broad Ripple this morning shows that there have been cases of typhoid fever there and it is more than probable that the typhoid bacilli was placed in the river with the other

While he lamented the fact that such a condition of the river exists, Dr. Ferguson could not help showing his joy that he had so soon been vindicated and that his analysis had been proved correct beyond a reason-The Board of Health and Mr. Davis, of the water company, have been asked to meet the Board of Works this morning at 9 o'clock, of Health asking that an analysis of the regard to the resolution of the Board water be made according to the terms of the contract, but it is probable, in the light of the later development, that another analysis will be considered unnecessary by

Mr. Davis. TRACKS MUST COME UP.

Board of Vacillators Make Another Bluff at the Car Company. The Board of Works yesterday sent a demand to the street-car company that its unused tracks on Kentucky avenue, between Missouri and West streets, and on Bloomington street, between Washington and Michigan streets, to be torn up in ten days. The order admits of only one interpretation and that is that if the tracks are not removed immediately the street department will find some work out of the President Mason was before the board i

regard to the orders to change the grad of part of the company's tracks. He asked that the company be required to do only part of the work this year. He estimated that the cost of making the changes would be \$40,000 and said the company intended to spend \$75,000 this year in extensions and improvements, which would make a heavy burden. The board agreed to further consider the matter.

SPRINKLING IMPROVED STREETS. Ordinance Against the "Garden Hose Fiends" Recommended.

The Council committee on sewers, streets and alleys last night decided to recommend the passage of the ordinance prohibiting the sprinkling of improved streets by individuals. The ordinance was introduced at the request of the Board of Works. It has been found difficult to sweep the streets at night because so many people wet them during the early evening and when the sweepers pass along they find all the dirt on the pavements in the shape of mud, which the machine cannot remove. The next morning the mud is dust again and there is complain that the streets are not properly cleaned The committee on contracts and franchises will report lavorably on the ordi nance granting Knight & Jillson the right to lay a switch across South Pennsylvania, connecting with the J., M. & I. "Y."

Resolutions Adopted. Improvement resolutions were adopted by

the Board of Works yesterday as follows: For a cement walk on the north side of For brick pavement in the first alley north of St. Clair street from Alabama street to For a local sewer in South Illinois street from Merrill street to a point 440 feet north. For a local sewer in the first alley west of Illinois street from Merrill street north to Norwood street, and in other streets and For a local sewer in Alvord street from eventh to Tenth street.

For a local sewer in Russell avenue begin-

ning at the Merrill-street sewer and ex-tending south in Russell avenue, and other streets and alleys adjacent. For a local sewer in the first alley east of ornell avenue from Ninth to Tenth streat For a local sewer in the first alley east of Bellefontaine street from Ninth to Tenth

Asphalt Contract Let.

The Board of Works yesterday awarded the contract for asphalting Alabama street from Morrison to Seventh street, to the Warren-Scharf Asphalt Paving Company, at \$6.13 a foot. The other bids were: Indiana Bermudez Asphalt Company, \$6.38; Western Paving and Supply Company, \$6.20.

Two sidewalk contracts were also let. C. S. Niemier will lay cement walks on Lexington avenue from State avenue to Frank street, at 57 cents a foot. Two other bidders bid at 64 cents. Charles H. F. Mankedick secured the contract for a brick walk on the north side of Lexington avenue from Linden street to State avenue at 34% cents a foot. Other bids were 35, 38 and 39% cents.

Bond for Michigan Street.

Browder & Shover yesterday filed their bond and received a contract to build a block pavement on Michigan street, from Indiana avenue to East street, in accordance with the award of the Board of Works last Wednesday.

Municipal Notes.

The water company was ordered to lay a main in Minnesota street from East street to Madison avenue. A petition signed by sixteen property owners was filed with the board yesterday asking for an asphalt pavement on Delaware street from Fourteenth to Fifteenth street: The board took final action on a resolution for cement sidewalks on Jefferson avenue from Michigan street to Clifford avenue, and for a brick walk on the south side
